Question #1 • Text Response • 11 responses (92%)

Which aspects of this class did you feel were intellectually or creatively stimulating?

Results:

- Seeing everyone's presentation was really interesting because it showed the various examples of the theoretical framework through familiar media. Having to present was a bit terrifying, but it was really cool having to find a media object and analyzing it so that we could share it with the class. Writing the final essay on our chosen object was also fun, since having the freedom to choose makes the essay less daunting. Finally, I really liked learning about how important it is to analyze the media we are constantly consuming.
- The synchronous discussions and readings were aspects that felt intellectually stimulating. With the readings, we learn conceptual material that correlate to what we talk about in our discussions and seeing the dynamic between media and the body, such as how bodies are represented in media, was very intellectually stimulating. The weekly presentations were also creatively stimulating, in that we had to try to explain the week's theoretical framework through a media object of our choosing.
- Crafting our projects related to the weekly topics is a very creative and intellectual way to learn.
- The in-class discussions helped my understanding of the topic regarding that week
- Creating and leading my presentation, class discussions, reading questionnaires.
- This class taught me a lot of things that didn't reach to me before.
- I like the weekly reading and the professor's explanation very much
- The lectures because they were very interactive
- The presentation for each student to do.
- Class discussions

- good

Question #2 • Text Response • 11 responses (92%)

Which aspects of this class did you feel contributed most to your learning?

Results:

- The questionnaires were really helpful, because it helped guide our reading a bit and helped me find the areas to focus on. Especially when the reading felt overwhelming or I felt like I couldn't grasp the main idea. I also think found that the course slides were really helpful, especially the housekeeping slides that stated each week's idea and seeing how they all connect.
- The discussions and presentations really help with my learning. Although, we have readings, there are times when I don't understand them too well, but after going through discussions and also listening to the presentations later into the week, I'm able to gain a better grasp of the reading.
- Lectures where Professor Ruberg explained the reading more in-depth, classmates' presentations, and reading questionnaires.
- Student presentations really let us perform and pick up what we learned.
- I think the students' presentations are very helpful
- Class discussions and weekly assignments.
- The readings, lectures, and presentations
- The readings we did were very helpful
- The questionnaire each week.
- questionnaires and lectures.
- good

Question #3 • Text Response • 10 responses (83%)

Which aspects of this class could be improved to enhance your learning?

Results:

- I'm not sure what could be improved for the class, since I feel like the class kind of exceeded my expectations. Going in, I was a bit overwhelmed since I have always struggles with theory. But Professor Ruberg does a great job of easing us into it and presenting the materials in a way that is easier to grasp, so I really appreciate that. For these reasons, I am glad I have been able to take three classes with them and wish I could have been able to take more.
- Perhaps a bit more explanation of each reading since there were a few I did not understand, and even in breakout rooms it was hard to break everything down.
- The choice in some of the topics and articles as sometimes I felt forced to agree and believe an ideology
- I think it's good enough.
- Everything is perfect
- everything is great!
- Maybe more readings
- good
- N/A
- N/A
